CALLPLEASE ENTERPRISE

2019 Edition

Jim Haviland

jim@callplease.com

818-532-6811

For many CallPlease users, security and user experience are becoming increasingly important, especially for the apps and services they rely on everyday. We have invested in new functions and services designed to meet the needs of our most professional users and have bundled them together to create CallPlease Enterprise. While we will continue to update the consumer version of our apps and services, the Enterprise subscribers will have exclusive access to the many features, will have the type of access to support and training that makes everyone more efficient and effective and will have a say in our roadmap. *Enhancements include:*

Domain Protection: Prevent employees from starting their own CallPlease account that lacks corporate oversight or security controls

Administrative Support: Administrative users have phone support to CallPlease experts for issue resolution, escalation and to arrange customized training for new users.

Enterprise Security: Enterprise subscriptions include support for all available security enhancements, including Two-Factor Authentication (2FA), SSO (OAuth, SAML), and Mobile Data Wipe to protect or revoke access from lost devices and former employees.
